PROFESSIONAL SUMMARY

Aspiring Software Engineer pursuing a Bachelor's degree in Information Science and Engineering, with a strong interest in Full-Stack Development, Artificial Intelligence, and Cloud Computing. Experienced in building innovative academic projects and committed to continuous learning, problem-solving, and developing impactful software solutions.

SKILLS

- **Languages & Scripting:** Java, JavaScript, C, SQL
- **Full-Stack Development:** React.js, CSS, HTML, Node.js, RESTful APIs, Postman
- **Cloud & Infrastructure:** AWS (EC2, S3), Git
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Database fundamentals

PROJECTS

- **SympCheck — Rural Healthcare Triage Companion** Sept 2025
 - Designed and developed a rule-based healthcare decision support system using Python (Flask) and Microsoft Azure to analyze symptoms, generate triage recommendations, and deliver secure backend services through RESTful APIs.
 - Developed a mobile-first application with real-time location tracking and an SOS emergency alert system, enabling users to share live locations with emergency contacts while ensuring secure communication and an intuitive user experience..
 - **Tech Stack:** React Native, Python (Flask), JavaScript, Location APIs, Microsoft Azure
- **Inclusive Voice-First E-Commerce Platform** Nov 2025
 - Designed and developed modular cloud backend services using Firebase, integrating the Gemini API to process real-time multilingual natural language requests with efficient performance and low latency
 - Integrated the Razorpay Payment Gateway to enable secure online payments, implementing robust exception handling and transaction validation to ensure reliable payment processing and data integrity.
 - **Tech Stack:** JavaScript, Gemini API, Firebase, REST APIs, Razorpay
- **FoodBridge – AI-Powered Surplus Food Redistribution Platform** Oct 2025
 - Developed a full-stack web application that connects restaurants, hotels, event organizers, NGOs, volunteers, and administrators to streamline surplus food donation and reduce food waste. Implemented secure JWT-based authentication and role-based access control for Donor, NGO, Volunteer, and Admin users.
 - Built RESTful APIs for food donation management, including donation creation, browsing, acceptance, delivery tracking, and user-specific dashboards. Designed a responsive and user-friendly interface using React and Tailwind CSS, ensuring seamless integration between the frontend and backend.
 - **Tech Stack:** React.js, JavaScript, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, REST APIs.

EDUCATION

- **B.E in Information Science and Engineering** Mangalore
Canara Engineering College (CGPA: 8.6) 2023 – Present
- **Pre-University Education — PCMC** Mangalore
Canara PU College (Percentage: 92%) 2021 – 2022

CERTIFICATIONS & HONORS

- **Hackathon Finalist** — Shortlisted among the Top 35 teams out of 1,000+ participants in AINNOVATION 2025 (Code4Bharat), a national-level hackathon organized by NMAMIT, Kyndryl & Microsoft.
- **Microsoft Azure Learning Challenge** — Successfully completed the Microsoft Azure Learning Challenge, demonstrating knowledge of Microsoft Azure services, cloud technologies, and modern application deployment.
- **Programming in Java** — Strengthened Java programming and object-oriented design skills through the NPTEL course offered by IIT Bombay.
- **C Programming** — Built a strong foundation in C programming and problem-solving through the IIT Bombay Spoken Tutorial certification.

LEADERSHIP & ACTIVITIES

- **Secretary (Cultural)**, Elected Student Council member, represented student body in decision-making and planning initiatives.
- **Delivered hands-on sessions for students on Prompt Creation and Creative AI Tools for Digital Art**
- **Founded and led the college cultural team, winning multiple VTU-level and intercollegiate competitions.**
